

Bradam Ltd – Environmental Policy

1. Introduction

Bradam Ltd is committed to conducting its operations in a manner that minimises environmental impact and promotes sustainability. As a responsible construction company, we recognise our duty to protect the environment and contribute to the UK's broader environmental goals.

2. Our Commitment

We are committed to:

- Complying with all relevant environmental legislation, regulations, and codes of practice.
- Preventing pollution and reducing our environmental footprint through effective waste management and resource efficiency.
- Continually improving our environmental performance through monitoring, training, and innovation.

3. Objectives

To fulfil our commitment, Bradam Ltd will:

- Reduce waste by reusing and recycling materials wherever possible.
- Use resources efficiently, including water, energy, and raw materials.
- Manage emissions from plant, equipment, and transport to reduce air pollution and our carbon footprint.
- Minimise noise and dust pollution on construction sites through effective site management.
- Ensure safe handling, storage, and disposal of hazardous substances.
- Protect biodiversity and the natural environment in and around our project sites.

BRADAM

- Promote environmental awareness among all employees, subcontractors, and suppliers.

4. Implementation and Responsibilities

- The Managing Director has overall responsibility for ensuring this policy is implemented and reviewed annually.
- Site managers and supervisors are responsible for enforcing environmental procedures on site.
- All employees and subcontractors are expected to follow environmental best practices and report any concerns.

5. Training and Awareness

Bradam Ltd provides relevant environmental training to employees and promotes awareness through site inductions, toolbox talks, and ongoing communication.

6. Review and Continuous Improvement

This policy will be reviewed annually or in response to significant changes in legislation or business activities. We aim to continually improve our environmental performance by setting and reviewing measurable objectives and targets.
